

Goose Pond Sanctuary Updates

2019-2023

Since October 2019, Goose Pond staff have put together periodic Goose Pond Updates that summarize the work and research conducted at Goose Pond Sanctuary throughout the year. Highlights include updates on raptors with Madison Audubon-funded transmitters, seed collecting and planting, prescribed fire season, citizen science, educational events, and much more! We will continue to send out approximately four to eight Goose Pond Updates per year, and will revise this sheet at the end of each year.

We hope that by reading these updates, you learn more about the work we do and never miss hearing about interesting wildlife sightings or research projects happening at Goose Pond.
